

# Ahkun AutoDaily

**Ahkun AutoDaily** automatically creates work reports and emails them, **audits application usage** and helps to **optimize business efficiency** for remote workers.

## Automate operations management while respecting employee privacy

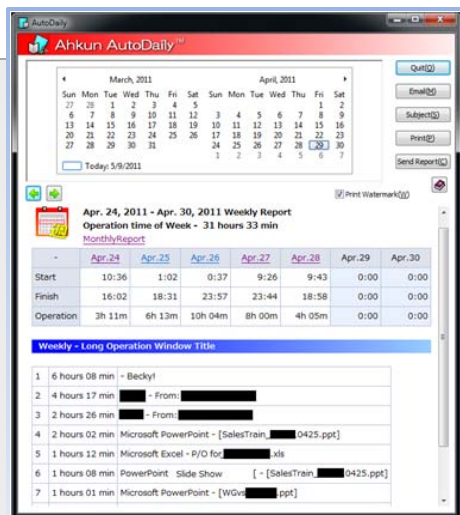

- Managers can keep on top of work hours and use of unauthorized applications by collecting PC usage time, task workload, applications used, etc...
- Choose from three types of report (Daily/Weekly/Monthly) while still respecting employee privacy.

## Prevent data leakage through documents by limiting print quantities and automatically inserting watermarks in printed materials

- Go beyond limiting print quantities to auto-insert additional data such as timestamp, computer name, department, ID number, etc...using watermark technology to reduce data loss and paper usage

## Easily control and manage client PC usage without additional hardware

- Use your existing web server and domain controller to automatically install the AutoDaily client and deploy policy settings

## System Requirements

OS supported	Windows 7 / Vista (32-bit / 64-bit version) Windows XP / 2000 (32-bit version) Windows Server 2008 / 2003 (32-bit version) Windows 2000 Server (32-bit version) Windows Terminal Service, Citrix 4.5 or higher
